	PIC Wire & Cable	Termination Instruction	ns T-110939-01
	A Division of the Angelus Corporation Ph (262)-246-0500 Fax (262) 246-0450 www.picwire.com	Approved : MCC	Date : 04/28/16 Rev : 1 (03/07/19)
	PO Box 330 Sussex, WI 53089	Distribution : USER	Uncontrolled if Printed
	Termination Instructions for PIC P/N 1109 (for PIC Ethernet Cable P/N's E10-	39, RJ45 Shielded Jack for 2 Pair Ethernet 424, E12424, E13424, E40424, & E61424)	Cables
	Required Tooling : X-acto Knife, Sharp Razor, Wire Cutters, Heat Gun, PIC P/N 110701 Soft Jaw Clamping Pliers (see pic to right). Note : Similar pliers acceptable	Aller	4191X 16 63 10
	Note: Diameter of the cable determines the number of pieces of ATUM 8/2 x 1 shrink tube to use. Please see chart below for required qty needed.	.0"	Dimensions in Inches (NOT to Scale)
		Figure 1	4 1 25 "
	Cable P/N Qty. Needed E10424 0 E40424 0 E12424 1 E13426 2	Cut	
1)	Install labels (if applicable). Install ATUM 12/3 x 1.0" (larger dia.) shrink tube, qty per chart above of ATUM 8/2 x 1.0" (smaller dia.) shrink tube. Discard any Make Cut A @ 1.25" from cable end, through cable jacket (Fig. 1). Remove jacl Make Cut B @ 2.0" from cable end, scoring the cable jacket (Fig. 1). Do Not ni into wire braids. Remove jacket.	unused pieces. → ket/braid/foil.	2.0 " \leftarrow 0.5" \rightarrow \leftarrow trim foil / teflon tape
2)	Shrink all pcs (as applicable) of ATUM 8/2 x 1.0" tube(s) onto cable, starting at cable jacket (cut B). Fold braids back over ATUM / Jacket as applicable, (Fig. 2)		
3)	Trim braids to 0.50" length per fig. 2. Trim foil / teflon tape to 0.200" length fro Be very careful not to nick or cut into wire insulation. Inspect to verify insulation after removing foil to verify insulation integrity on all wires.	1 0	← 0.35" start shrink
4)	Install ATUM 12/3 \times 1.0" shrink tube over the braids, and shrink onto braids an a heat gun, starting @ .350" from exposed foil/wire pairs (Fig 3), to secure all w		
5)	Separate each of the pairs for preparation of installation into the wire carrier. M of each pair as much as possible. Install the pairs into the wire carrier, untwistin least as possible. See fig 4a & pics below for wiring confguration & wire carrier	g the pairs as	isition
	Notes : Disregard color designation printed on wire carrier Open strain relief clamp and install wires. Install the wires in the bottom row first and pull wire ends. Install the remaining wires into the top row of the wire carrier. Wires in the top row must be pushed down into respective slots firmly (Install the wires snug to minimize transition length between cable exit a		
6)	Before applying strain relief clamp, position the cable so that the ATUM shrink is up to the wire carrier housing (Fig. 4b). Close and crimp strain relief clamp u clamping pliers until the clamp latches into place. Trim off each wire flush with each assigned wire carrier cavity (Fig. 4b).	sing soft jaw the end of strain relief clamp,	open position pull wires snug
7)	Align the panel jack body to fit onto the wire carrier & cable and push together. the soft jaw clamping pliers height to crimp squarely on the wire carriers and co the body and wire carrier sections firmly together (Fig. 5), until latch on each si snaps into place.	he wire carriers and compress	
8)	Engage shield contact by pressing down on shield contact slide with a flat head screw driver (Fig. 6). Ensure shield contact is engaged by making sure shi is in contact with the cable.	eld contact
