Termination Instructions for PIC P/N 150520 Avionics Coaxial Socket Contact (for UH67163 Coax Cable)							
	Recommended Hand Tools :	X-acto Knife, Sharp Razor, Wire Cutters					
		M22520 / 5- 01 Hex Crimp Tool					
	Required Cable Tools :	M22520/5-41 Hex Crimp Die Set, Cavity A (.290	0" hex)				
		Soldering equipment					
		Treat Outi					
	Note : When stripping Aluminum conductors (and all conductors as a standard practice) take extra care to avoid nicking or cutting into center conductor or braids during cable stripping.						
r or dest results, the use of automatic or laser stripping equipment is recommended.							
					Dimensions in Inches	- NOT to Scale	
1)	Cut cable end squarely, and re-shape the	cut end to concentric. Install the 1" piece of	F	igure 1	Cut A	→ .550" ←	
	ATUM 12/3 dual wall black shrink tubing provided and crimp ferrule onto the cable (Fig. 1). Make cut A @ 0.550" from cable end, scoring the jacket only (Fig. 1). Do Not nick or cut into wire braids. Remove jacket (Fig. 1).						
2)	Flare the braid ends out, keeping at least half the braid weave intact (Fig. 2). Unwrap			igure 2	flare braid en	ds out	
,	the exposed helical shield until even with	n flared braids (Fig. 2), to make space for Cut B.					

3)	Make Cut B @ .170" from the cable end	, through the dielectric (Fig 3). Do Not nick or					
	cut into the center conductor. Remove dielectric, verify center conductor integrity.					MAN .	
-	Demonstration of all of the commission of the community o				11411/20	7 In exposed spiral shield	
4)	For safe removal, it can be scraped off w	vith opposing fingernails to avoid damage to	F	ioure 3	Cut B .170	ı" →	
	plating (Fig. 4) until completely removed.			igure s	CW B 1170		
	L						
5)	Install center contact onto the cable center conductor, until contact is fully seated on the center conductor (Fig. 5). Conductor should be visible in inspection hole. Solder						
						1112	
	the center contact onto the center conduc	ctor.	F	igure 4	rei	nove plastic covering	
0	Flare open the remaining braids down to the jacket (Fig. 6), maintaining braid weave as intact as possible. Unwran helical shield to expose dielectric down to jacket (Fig. 6)				action of the
